

## **Position Title: Supplier Quality Engineer / Sr. Supplier Quality Engineer (full-time)**

### **Company Overview:**

PBS Biotech, Inc. is a private, fast-growing company based in Camarillo, CA that manufactures and sells the most advanced single-use bioreactors for the biopharmaceutical market. Our fully scalable bioreactors enable process development and commercial manufacturing of cell-based products, particularly for the rapidly emerging cell and gene therapy market. We also provide world-class contract research and development services with leading expertise in various cell and gene therapy product types.

### **Job Description:**

PBS is seeking an experienced and motivated Quality professional with proven experience performing supplier quality engineering functions. This position requires experience supporting products that meets standards for a regulated environment such as biopharma, medical device, or similarly regulated field. The ideal candidate will have demonstrated leadership in a supplier quality engineering role or similar technical role supporting biopharmaceutical or medical device products, and have experience performing one or more quality or engineering functions including quality engineering, design control, Six Sigma, Lean, materials science, CAPA, and investigations. Note: This position will be graded as a senior level engineer if warranted by skills and experience of the candidate.

### **Roles and Responsibilities:**

- Lead PBS's supplier management program which includes overseeing the quality system requirements for suppliers of materials and services in support of specialized bioreactor systems that must meet standards for use in GMP production
- Perform assessments to determine supplier capability, verify supplier qualifications, perform audits, and support supplier selection.
- Interface with suppliers to communicate requirements, perform assessments, issue and manage supplier corrective actions, and provide feedback on supplier performance.
- Collaborate with other area functions to support product development, production, and investigate supplier related complaints and nonconformances.
- Chair supplier review board, provide reports to management and quarterly management review
- Manage supplier documentation including generation, revision, and storage of procedures, approved supplier list, questionnaires, and corrective actions.

**Skills and Requirements:**

- Bachelor's degree in Life Sciences, Engineering, other science-based area, or equivalent skills and experience
- Minimum 3-5 years of experience in a biotech/pharmaceutical (GMP), medical device (ISO 13485), or similarly regulated medical field performing supplier quality management, quality engineering, purchasing/supply chain, materials engineering, QA, or similar discipline in a highly regulated industry
- Excellent verbal and written communication skills
- Proven ability to work cross functionally, in teams, as well as work individually with minimal supervision, or as a team leader
- This role may require 10-25% travel

**Posting Date:** October 2019
