

JOB OPPORTUNITY

Position Title: (Senior) Process Development Engineer (Full-Time)

Job Description:

PBS Biotech, Inc. is a fast-growing private company based in Camarillo, CA that manufactures and sells the most advanced single-use bioreactors for the biopharmaceutical market. We are seeking a highly motivated Process Engineer to support manufacturing process as well as develop new processes in support of new product development initiatives.

Roles and Responsibilities:

- Support the day-to-day processes for manufacturing bioreactors and single-use components
- Manage and execute changes to processes and BOMs using the PBS change process
- Give day-to-day direction to manufacturing support engineering technician
- Develop new manufacturing processes in support of new products under development
- Develop and qualify fixturing to assist operators in assembling products
- Execute IQ/OQ/PQ to qualify manufacturing processes.
- Execute all functions in accordance with Good Manufacturing Practices

Required Skills and Experience:

- Bachelor's degree in Mechanical Engineering or Industrial Engineering.
- Lean Manufacturing experience with designing and creating work cells and balanced manufacturing lines.
- Process engineering experience for manual assembly processes
- Process development experience for manual and semi-automated assembly processes
- Minimum of 5 years of experience.

Preferred Skills and Experience:

- Experience with Lean Operating Systems (such as Toyota Production System, Shingo)
- Experience with SPC (Statistical Process Control)
- Experience using Design of Experiments (DOE)
- Certified Green Belt or higher in Six Sigma or Lean Sigma
- Experience with welding and handling of thin films

Compensation:

- A qualified candidate will be eligible for compensation package with competitive salary, benefits for health insurance, retirement plan, vacation, and stock options according to the company's policy.
- Work location is in Camarillo, California USA.
